

# Bookmark Courses in Brightspace (by D2L)

You can Bookmark your current (live) courses using the *Select a course ...* drop down list in the minibar. When you bookmark a course, it will always appear on top of the course list in this drop down.

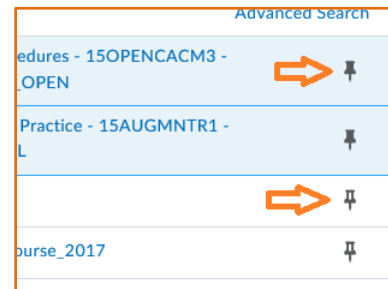

Here are the steps to bookmark a course:

1. Click on *Select a course ...* icon on the minibar (see the orange arrow below).
2. Click the pin icon next to the course you want to bookmark.

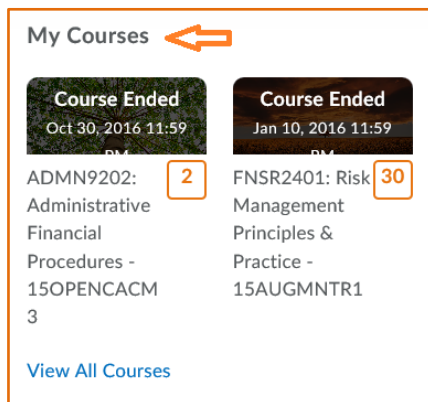

Bookmarked courses are highlighted in the list. Note the difference in appearance of the pin icon of bookmarked courses and the other courses.

Other courses will be listed alphabetically following the bookmarked.

**Note:** Only bookmarked courses will appear in the *My Courses* widget on the home page with a visual icon. To access other courses from this widget, you need to click on the *View All Courses* link.

The visual icon indicates if a course has ended or has not started yet.

The number for each course shows the number of updates in that course. Updates are events in the course that require instructor's attention and action, such as new discussion posts, or new assignment files submitted.
